

ACASI, CASI, and CAPI Systems Custom Built for Your Research Studies

Our programmers, under the direction of Alice Tang, MS, PhD, Associate Professor at Tufts University School of Medicine, are equipped to build a powerful, efficient research tool for your research studies.

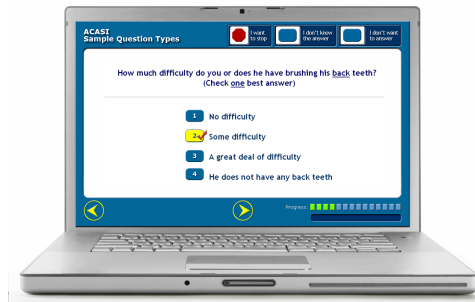

Electronic data collection saves time, ensures accuracy and provides consistent questionnaire delivery. Our systems work on Windows-based computers including netbooks and tablets.

Privacy Ensures Accurate Data

The ACASI Questionnaire System is especially well suited for collecting sensitive data on topics such as alcohol and illegal drug use or risky sexual behavior.

Flexible and Convenient

Learn about the advantages and features of ACASI, CASI and CAPI systems. See the next page for more sample question types. Download a free interactive demo: <http://acasi.tufts.edu>

Our ACASI, CASI and CAPI systems have been used at:

- Tufts University School of Medicine
- Brown University School of Medicine and Fenway Health
- Johns Hopkins School of Medicine and Bloomberg School of Public Health
- University of Texas Medical Branch at Galveston
- Thomas Jefferson University
- University of Miami
- City University of New York (CUNY)
- Baylor College of Medicine
- National Institute of Infectious and Tropical Diseases (NIITD), Hanoi, Vietnam
- Vanderbilt University
- Ohio State University
- University of Colorado
- Seattle Children's Hospital
- University of Toronto
- University of Puerto Rico/NDRI
- Worker Question Bank: Better Work Vietnam
- Tufts University School of Dental Medicine
